2008-2009 Needs Assessment Survey: Administrators

District Wide Financial Resources Issues: The items in this section are special programs currently funded by the district. This list does not include recreation programs, which are funded separately. Although all programs may be of great value to you, it is important that we be able to see which ones, relative to the others, have the greatest support district-wide, since funding one program may mean having less for another. Knowing how you feel about these items will help the district determine priorities for programs to add if additional funds become available, or areas to scale back or eliminate if budget cuts become necessary. You are being asked to rank priorities at all grade levels, regardless of your current assignment, since the 6-8 experience is dependent on the K-5 experience, and vice-versa. (The lists are in alphabetical order). Note: At the K-5 level, "specialist" refers to teachers other than the classroom teacher who provide instruction in a specific area. For example, although PE, art and music can be taught by the classroom teacher, we currently have specialists to enhance the programs. Please answer this section from the perspective of the importance of each program to the STUDENTS' overall learning experience K-8. In Section D of the survey you will have a chance to comment on curriculum, program, and support services as they relate specifically to your own work experience.

14. Existing Programs K-5: In this section choose no more than 5 items as higher priority, no more than 5 as medium priority, and no more than 5 as lower priority, relative to each other, or indicate No Opinion

Top number is the count of respondents selecting the option. Bottom % is percent of the total respondents selecting the option.	HP	MP	LP	NO	HP Rank
